Lake Manyara

Tanzania's Lake Manyara National Park offers a true wilderness experience in a diverse landscape, from its Rift Valley soda lake to dense woodlands and steep mountainsides.

Why visit Lake Manyara?

A Lake Manyara safari offers an array of habitats with coursing rivers, seasonal flamingos and the famous Manyara tree climbing lions.

1

EXPLORE DIVERSE HABITATS

The reserve boasts a higher diversity of plant and animal species than the Serengeti and is host to 11 ecosystems, with nine winding rivers and an array of trees including the famed baobab and some of the tallest acacia tortilis in Tanzania. Diverse landscapes feature the bubbling springs at Maji Moto to saline floodplains on the lakeshore where grazing herbivores dot the terrain.

2

FLAMINGOES AND BIRDLIFE

The shores of the lake, encrusted with pink flamingo, attract more than 400 species of birds, many of them waterfowl or migrants. Look out for our Star Birds and those with an eye for birding can enjoy birdwatching while on game drives.

3

BREATHTAKING LANDSCAPES

Tanzania's Lake Manyara National Park offers a true wilderness experience ranging from the Rift Valley soda lakes to dense woodlands and steep mountain slopes. The Great Rift Valley is one of the greatest ruptures visible on the earth's surface. Coursing streams began to shape its steep sides and the Rift Valley grew wider leaving behind a chain of soda lakes including Lake Manyara.

4

TREE CLIMBING LIONS

Most people think that the famous tree-climbing lions here have developed their climbing habit to get away from annoying insects. At &Beyond, we have our own theory – they're jealous of our magnificent treehouse suites. Enjoy spectacular sightings of these felines making their way up trees, proudly surveying their domain.
